

US 53 Corridor Projects Spooner -Gordon

January 2010

The Wisconsin Department of Transportation continues to study and map future improvements to the US 53 corridor, including alterations to several intersections in the area between Spooner and Gordon. There have been some modifications to the schedule that the department would like to make property owners aware of.

Project Alternative Update

- The timeline has been adjusted to insure all issues with multiple government agencies can be addressed.
- A historical and archeological analysis needs to be completed to determine if there are issues with alternatives being carried forward in the study.
- The archeological study will be completed after the snow melts in the spring.
- Once the analysis is completed, WisDOT will select their preferred alternatives.
- A public information meeting will be held in May or June to present the preferred alternatives, along with the findings of the study.

Construction Update

In the meantime, WisDOT has scheduled other improvements to US 53 this summer. A pavement replacement project is scheduled to begin in early spring and continue until approximately Labor Day. The project, in the northbound lanes, will start just north of the US 53/US 63 interchange and proceed north to just south of Whalen Lake road.

Traffic Impact

Travelers will be restricted to single lane, 2-way traffic, with cross-overs at both ends. Temporary signals will be installed at the County E and North US 63 intersections in Trego.
